Electric vehicles

Commonly known as EVs, are automobiles powered by electricity stored in rechargeable batteries or another energy storage device. They offer a promising alternative to traditional internal combustion engine vehicles, primarily due to their potential to reduce greenhouse gas emissions and dependence on fossil fuels. Promoting the use of electric vehicles our college campus is a commendable initiative with several potential benefits.

Ban on use of Plastic

Not just restricted to marketplaces or shops, the plastic ban has reached the college campuses as well. To inculcate the idea of plastic free living amongst the youth and to combat the environmental impacts of plastic waste while making India more sustainable, the University Grants Commission (UGC) has directed all universities and higher educational institutions to ban the usage of single-use plastics on campus. As per the directives, in college have banned the usage of take-away plastic cups, lunch wrapped in disposable plastic packaging, straws, bottles, disposable food-service cups and plates, and plastic bags in this campus
