REPORT

Activities for developing competencies and skills in different functional area

Organising lesson plan

Euphrasia Training College for women provides guidance and assistance in planning, preparing and implementing lesson plans during Internship programmes. In the first stage discussions are held regarding the instruction of the lesson plan. After that topic is selected each student is directed to write their own lesson plans. The structure of the lesson plan is constructivist in nature. In each lesson plan there is an introductory activity followed by different kinds of developmental and concluding activity. The last stage of the lesson plan is follow up activity. Here the teacher provides homework to students.

Developing Teaching Competencies

Euphrasia Training College for women provides assistance to develop teaching skills among the students throughout their course. Teaching competencies help teachers improve their teaching methods and benefit student's academic development and skills. We start the day in college with a morning assembly which mainly includes prayer, newspaper reading and thoughts of the day. This gives students an opportunity to express their views freely in front of whole group. We organise many programmes to develop teaching skills. Firstly we conduct micro-teaching sessions through which children can develop specific skills. It is then followed by discussion and criticism class session to develop the critical thinking skills of the students.

Assessment of Learning

Euphrasia Training College for Women conducts different assessment tests to evaluate the performance of the students.

Technology use and Integration

Technology integrated education is an important part of our education system. Our college provides ICT facilities to the students. Sense boards are installed in every classroom. This sense board helps both the teachers and the students to take classes, seminars, discussions etc. Mr. Shinu Raj is in charge of ICT Education.

Organizing Field Visits

Euphrasia training college gives importance to experiential and participative learning .Our college arranges field visits of historical and cultural importance. Field visits can help students learn about the real world, improve their observation and reasoning skills and develop a sense of belonging to the region.

Outreach activities

Our college organised a number of outreach activities to help students develop civic responsibility, soft skills, leadership skills, and team building skills. They can also help students learn to think critically, negotiate and connect with their communities. The major activities organised by our college flash mob, awareness classes, field surveys etc.,

Community engagement

Community engagement is a strategic approach to building relationships with organisations, community stakeholders, developing communications, and managing interactions to achieve specific outcomes for the community and the organisation.
