Euphrasia Training College for Women supports the innovative activities of students and provides adequate facilities for the development of their innovative ideas. As this is a teacher training institution we have provided workshops in different subjects. Puppetry workshops conducted in the College. A guest faculty was invited to conduct the workshop. Materials were collected by the students themselves and students were asked to make puppetry of their choice. After making puppetry these students are asked to present a story to the whole group with the support of these puppets. The objective is to present their innovative ideas into action which they can use in the teaching learning process. During practice teaching sessions also, they used these puppets in teaching different subjects which is suitable for that situation.
